Organised by: EWMA & International Compression Club (ICC)

INVITATION

EWMA and the International Compression Club (ICC) in collaboration are proud to announce a sequence of seminars on the subject of Leg Ulceration and Compression.

The origin of this idea is a shared impression that the use of compression is not thoroughly developed and implemented in the region. In addition, the EWMA Leg Ulcer Project being implemented in the Czech Republic, Poland and Slovenia is coming to its end and has produced results and knowledge which are highly relevant in terms of advancing the treatment of leg ulceration.

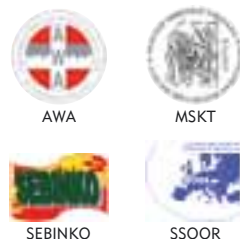

The seminars will take place in three capital cities situated along the Danube River and the seminars should be seen as a first step in implementing guidelines for leg ulcer and compression treatment.

BRATISLAVA Slovakia, 10 October 2011

VIENNA Austria, 11 October 2011

BUDAPEST Hungary, 13 October 2011

The seminars will be organised in corporation with the local EWMA Cooperating Organisations.

The main objectives of the seminars are to:

- Provide a status on the current treatment of Leg Ulceration and use of compression therapy in the countries and regions where the seminars take place.
- Introduce the ICC guidelines in the treatment of leg ulcers and discuss the implementation of the guidelines.
- Present the key findings of the EWMA Leg Ulcer Project teams in Poland, Slovenia and the Czech Republic and to discuss how the results can be used for improving treatment of leg ulcers in selected surrounding countries.

The programme will be a mixture of lectures, practical workshops, industry symposium, and discussion forums. Companies will be offered to exhibit during the seminars. The faculty will consist of international speakers and local experts in the field.

These seminars are of interest mainly for physicians and nurses from the region, although decision-makers on issues relating to prevention and treatment of leg ulceration also will benefit from these seminars. Industry representatives working with Leg Ulceration and Compression will also find these events interesting.

We look forward to seeing you in BRATISLAVA, VIENNA or BUDAPEST.
Thank you!

Finn Gottrup, EWMA & Hugo Partsch, ICC
